Weatherbys Scientific announce certification as approved Genomic Nominators by The Council on Dairy Cattle Breeding (CDCB).

Weatherbys Scientific are pleased to announce our certification as approved Genomic Nominators by The Council on Dairy Cattle Breeding (CDCB). Now our customers have a complete solution from Weatherbys Scientific to drive their dairy genomic improvement as selection programs. Weatherbys Scientific can generate SNP genotypes, perform Parental Verification, analyze single gene traits of health and economic interest, nominate the animals to CDCB and consolidate the genomic evaluations into a single data set.

Since the first CDCB evaluations in 2009, CDCB have established themselves as best, most reliable and most accurate genomic evaluator in the US and have established internationally recognized benchmarks. CDCB houses the largest genomic database in the world for dairy cattle.

Weatherbys Scientific have a strong reputation as one of the leading high throughput animal genomics labs in the world with a focus on bovine genetic testing. In the last 3 years alone, Weatherbys Scientific have delivered over 1.8 million SNP genotypes to their customers in the last 3 years alone.
